Art Unit: 1761

1. Claims 1-13, 21 and 22 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 06/07/05.

2. Claim 17 is objected to because of the following informalities: In claim 17, "gelatinization " is misspelled. Appropriate correction is required.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 18 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis in claim 14 for "said processing yield" (claim 18) or for "the meat source under elevated heat" (claim 20). Corrections are required without new matter.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 14-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas et al (6,869,631, cols 2-6 and the claims) in view of Razaa (6,780,449).

Art Unit: 1761

Thomas et al discloses mixing meat in a chamber with a marinade including water, STPP, soy protein, broth, salt and 2 starches having different gelatinization points. A vacuum of at least 22 inches is pulled in the chamber and the meat is infused with the marinade by tumbling in the chamber. The meat is subsequently discharged from the chamber, diced, frozen and then cooked. It would have been obvious to include animal fat or vegetable oil in the marinade of Thomas et al since it is well known to vacuum tumble meat in a marinade including starch, flavor/spices and fat or oil, as evidenced by Razaa (col. 1, lines 60-65; col. 2, lines 55-59; col. 3; and col. 5, line 61 to col. 6, line 60.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Moody, Cohen, Gasbarro, Leu, Karales, Halden et al and Samson show various procedures for marinating meat.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arthur L. Corbin whose telephone number is (571) 272-1399. The examiner can normally be reached on Monday - Friday from 10:30 am to 8:00 pm.
